

Capventure

SPRING-SUMMER COLLECTION 2022

About Capventure

Capventure is an innovative design and wholesale company from the Netherlands. Capventure is the founder of four brands: Puhlmann, Cabanaz, The Zoo and Zuperzozial. Capventure works together with designers to create a product range which is fashionable but also functional for daily use. Each product is carefully selected, designed and styled by our creative panel. Our mission is to provide trendy and functional gifts in which design appeals to a wide audience. In short, affordable must haves for everyone.

The collections of Capventure are sold in over 30 countries worldwide, carrying out products that exceed cultural differences. In many countries we work with exclusive agents or distributors. Please contact the distributor of your country for further information (Check last page for detailed contact information). If your country is not represented by a distributor, no worries we also supply directly to the retail market.

Social & Environmental responsibility

Capventure only cooperates with suppliers that guarantees safe, fair, legal and humane working condition for factory workers. We focus on developing packaging that is recyclable & eco-friendly and minimize the use of plastic. Among all our brands it is our aim to add products which have a sustainable profile in one way or another. For example, products that are partly made from recycled or sustainable materials.

Use our product-video's !

We created more than 100 product-video's. We have 4 channels; each brand a channel. Please feel free to share these product-videos in your communication.

zuperzozial

Zuperzozial aims to create products that respect our world in a simple and smart way. Environmentally conscious design but much more than functional: contemporary products that are as stylish as they are durable. What the Zuperzozial collections have in common is that they are made with the future in mind.

superzozial

Bioplastic C-PLA

- . from renewable resources
- . durable
- . dishwasher safe (eco/50°C)
- . short microwave heat up
- . no BPA and no melamine
- . plant based plastic

What exactly is C-PLA?

Superzozial aims to create products that respect our world in a simple and smart way. We introduce a range of products made of renewable resources. The material we use for that is C-PLA, a biobased plastic. How do we make biobased plastic instead of a fossil-based plastic like Polypropylene?

- 1 Instead of fossil resources we use plants which contains a lot of a natural sugar, like corn, beetroot, or cassava. We extract the sugar from the plant which results in a starch.
- 2 Next step is fermenting this starch into a lactic acid; a milk acid.
- 3 By adding talc powder to the lactic acid it starts to crystallize.
- 4 Lactic acid will be polymerized which makes it a Poly Milk Acid. The talc powder creates a PLA that is more resistant to heat, namely C-PLA (Crystallized Poly Lactic Acid). A new plastic material is made. The appearance is a grain, so called granulate.
- 5 With this C-PLA granulate we start producing products by – for example – injection moulding. The result is a product with the specifications of an ordinary plastic, but made of renewable resources.

Our C-PLA products are certified for food contact, dishwasher safe and suitable for short heat up in the microwave. Good to know: C-PLA does not contain melamine or BPA.
